PAPERBOARD

Remove – For Ventilation

Insert – In Winter or to Seal Crawlspace

Manufactured with 100% recycled fiber!

100% recyclable!

Biodegradable!

Will deteriorate in flood waters!

Approximately 80% of this is composed of post-consumer recovered fiber. Almost half is made up of loose waste collected through curbside recycling, while the remainder is commercial/industrial collection of baled mixed wastepaper, old corrugated container (OCC) and baled recycled newspapers. The remaining 20% is pre-consumer fiber sources from industrial trimmings and the like. All paperboard products are 100% recyclable, biodegradable, and will deteriorate in water.
